Summary

A creative Web Developer with a great experience in design and some experience in the e-commerce world. Coming with a lot of motivation, positive energy, responsibility and passion. Very eager to learn new technologies and always strives beyond the sky. Experience working with Photoshop, owner of an active e-commerce store and a small Branding Agency offering business promotions as a side hustle.
Interested in a MERN / MEAN / Front End position.

Education

- **Full Stack Developer** at **HackerU**
  November 2020 - July 2021
  600+ Academic hours - Server / Client-side dev, Specializing in MEAN / MERN Stack
  4+ Projects - *MERN Stack | MEAN Stack | Angular with Firebase | & More on Github*

- **Mobile Development** at **John Bryce**
  December 2013 - January 2015

  HTML | CSS | Javascript | OOP | Objective C | Swift

- **Online Courses** at **Udemy/Linkedin**
  Adobe Photoshop | Adobe XD | Figma | Git | Github | Docker | Wordpress | Elementor

Work Experience

- **Freelancer, Online Store & Branding Businesses**
  March 2020 - Today

- **Sales Agent, Q8 Trade, Haifa**
  July 2019 - July 2020

- **Customer Retention Manager, Toyga, Tel Aviv**
  September 2016 - October 2017

- **Shift Manager, Hot, Nesher**
  September 2013 - September 2016

Project

- **PetMe, MEAN Stack, Pet Adoption**
  I got inspired from Klavlav website, not related to hackerU neither a tutorial, I'v built everything on my own, Front to back and along the process I had many challenging problems , learned new strategies and libraries, worked with GitHub (issues , commits , Pull requests etc)

- **DevMeet, MERN Stack, Social Network for Developers**
  I got inspired from a tutorial and Twitter which is what I was aiming for at the beginning, I'v learned and solved many problems during this project and committed every single step in Github

Volunteering

English Teacher
March 2018 - March 2018
I've volunteered teaching English to children at a small school in Vientiane, Laos
